

# Ventilation

Mobile and stationary: safety ensured by specialized technology

# Ventilation

Mobile and stationary: safety ensured by specialized technology

Safe and sound ventilation at all times

When the respiratory system is ravaged by disease or injured in an accident, ventilation of the lungs can be impaired to a life-threatening degree. We develop reliable, customized technologies that restore proper ventilation and unload the respiratory pump. Patient safety, effective treatment and operating convenience are our prime concerns. Our work results in products that automatically ventilate in response to patient needs and thereby offer maximum support to patients and assistance to medical personnel.

## Our innovative features

AirTrap Control:  
Pressure relief to prevent dynamic hyperinflation

LIAM (Lung Insufflation Assist Maneuver):  
Secretion management with cough support

Trigger lockout:  
Effective protection from auto triggering and trigger artefacts

I/2/3 Ventilation programs:  
Flexibility and convenience with up to three different ventilation programs

Expiratory ramp:  
Increase in expiratory volume with splint to hold airways open

Target Volume:  
Optimum tidal volume ensures safety and stability

Diseases	Therapy devices
<p>Neuromuscular diseases, e.g.,</p> <ul style="list-style-type: none"> <li>■ Amyothrophic Lateral Sclerosis (ALS)</li> <li>■ Muscular dystrophy</li> <li>■ Spinal muscular atrophy</li> <li>■ Post-Polio Syndrome</li> </ul> <p>Restrictive disorders, e.g.,</p> <ul style="list-style-type: none"> <li>■ Thorax deformities (kyphoscoliosis)</li> <li>■ Post tuberculosis Syndrome</li> <li>■ Interstitial lung diseases</li> </ul> <p>Obstructive respiratory disorders, e.g.,</p> <ul style="list-style-type: none"> <li>■ COPD</li> <li>■ OHS</li> </ul>	<p><b>IV / NIV</b></p>  <ul style="list-style-type: none"> <li>prisma VENT30-C + prisma VENT40</li> <li>Mobility and comfort at every level</li> <li>■ Simplest use with intuitive menus, easy operation and quick access</li> <li>■ Whisper-quiet ventilation provides more comfort and well-being for patient and partner</li> <li>■ Suitable for invasive and non-invasive ventilation</li> <li>■ Helpful functions for COPD treatment: AirTrap Control, Expiratory ramp and Trigger lockout</li> <li>■ With autoST mode (autoEPAP, autoF) and target volume (only available for prisma VENT40)</li> <li>■ Integrated oxygen connection</li> <li>■ Three ventilation programs can be set and stored</li> </ul>  <ul style="list-style-type: none"> <li>prisma VENT50 + prisma VENT50-C</li> <li>High-level ventilation</li> <li>■ Simplest use with intuitive menus, easy operation and quick access</li> <li>■ Whisper-quiet ventilation provides more comfort and well-being for patient and partner</li> <li>■ Suitable for invasive and non-invasive ventilation</li> <li>■ Helpful functions for COPD treatment: AirTrap Control, Expiratory ramp and Trigger lockout</li> <li>■ prisma VENT50-C is equipped with High-Flow Therapy mode (HFT). In HFT mode the device provides a constant flow from 5 to 60 liters per minute.</li> <li>■ Broad range of disorders can be treated with leakage circuit and single patient circuit with patient valve</li> <li>■ With autoST mode (autoEPAP, autoF) and target volume</li> <li>■ Integrated secretion management, cough support LIAM</li> <li>■ Mouthpiece ventilation</li> <li>■ Integrated oxygen connection</li> <li>■ Three ventilation programs can be set and stored</li> </ul>  <ul style="list-style-type: none"> <li><b>VENTIlogic LS</b></li> <li>For life-supporting ventilation</li> <li>■ All circuit systems can be used: single or double circuit with patient valve and leakage circuit</li> <li>■ Pressure and volume-controlled ventilation modes</li> <li>■ Mobility design for use at home and in hospital</li> <li>■ Three ventilation programs can be set and stored.</li> </ul>

Therapy analysis
 <p>prismaTS and prismaTS lab</p> <p>For fast and flexible patient management</p> <p>prismaTS offers adaptable patient management and a quick summary or detailed analysis of therapy. The software solution also provides fast and easy assignment of patients to devices. Other innovations include an optimized therapy calendar and patient files, plus an improved summary of the course of nighttime therapy. Detailed information can be called up at any time.</p>

# Overview of ventilators

	Functions	prisma30ST	prisma VENT30-C	prisma VENT40	prisma VENT50 / prisma VENT50-C	VENTIlogic LS
Type of ventilation	Non-invasive ventilation	✓	✓	✓	✓	✓
	Invasive ventilation	—	✓	✓	✓	✓
Hose system	Leakage circuit	✓	✓	✓	✓	✓
	Single patient circuit with patient valve	—	—	—	✓	✓
Device features	Double patient circuit with patient valve	—	—	—	—	✓
	Max. inspiration pressure	30 hPa	30 hPa	40 hPa	50 hPa	45 hPa
Ventilation modes	EPAP / PEEP pressure range	4 – 25 hPa	4 – 25 hPa	4 – 25 hPa	4 – 25 hPa (leakage circuit) 0 – 25 hPa (valve system)	4 – 20 hPa (leakage circuit) 0 – 20 hPa (valve system)
	Tidal volume	300 – 2000 ml	100 – 2000 ml	100 – 2000 ml	100 – 2000 ml	50 – 3000 ml
Special therapy options	Respiratory frequency	5 – 35 bpm auto, off	0 – 60 bpm	0 – 60 bpm	0 – 60 bpm	5 – 45 bpm
	Leakage mode	CPAP, APAP, S, ST, autoST, T	CPAP, S, ST, autoST, T	CPAP, S, ST, autoST, T	CPAP, S, ST, autoST, T	CPAP, S, ST, T
